

Performance Technical Rider

PLAYERS

- 2x Cdj's
- 1x 3 channel mixer (3band EQ per channel)

MONITORING SYSTEM

- 2x monitors left and right (one monitor acceptable for small venues, preferred right side)
- Must be able to project all frequencies well low , mid and highs.
- Must be 180 degrees to each other,
- Club/venue system should not sound louder than monitors at the booth (a well ratio of room sound to booth sound)
- Lifted to about height of 150cm/4.9feet (or monitors should be able to project well sound and all frequencies to that height).

BOOTH LIGHTING:

- Reasonable lighting for Dj to be able to view cd collection and Dj equipment.
